

July 14, 2020

The Honorable Nancy Pelosi  
Speaker of the House  
United States House of Representatives  
204 Capitol Building  
Washington, D.C. 20515

The Honorable Kevin McCarthy  
Minority Leader  
United States House of Representatives  
H-204 Capitol Building  
Washington, D.C. 20515

Dear Speaker Pelosi and Minority Leader McCarthy:

On behalf of the millions of veterans, service members, their families, and survivors that our organizations represent, we call on your support for the adoption of Rep. Harder's bipartisan House Amendment 264 into the House version of the FY 2021 National Defense Authorization Act (NDAA), H.R. 6395. This amendment is identical to Sen. Tester's proposal in the Senate.

Tens of thousands of veterans are still suffering from the consequences of Agent Orange use in Vietnam. By including House Amendment 264 in the NDAA, Congress will care and provide benefits for those with the serious illnesses of bladder cancer, hypothyroidism, and Parkinsonism.

Each of these diseases meets the scientific threshold of the National Academies of Sciences, Engineering, and Medicine to be credibly linked to Agent Orange. The House and Congress can act now to add these conditions to the list of Agent Orange presumptive diseases.

We call on you to lead and pass House Amendment 264 into law and end the waiting for many of our nation's ill veterans so they can receive disability benefits. There is more work to be done to care for those who are ill from toxic exposures, including adopting hypertension as a presumptive disease as linked by the National Academies, but with your leadership, tens of thousands of Vietnam War veterans will receive their benefits and justice. Thank you for your continued support of veterans, service members, their families, and survivors.

Respectfully,

See attached list of supporting organizations
